iatricSystems™

DR Resource Center™

DR Resource Center™ is your one-stop shop for all things Data Repository related — technical resource, training center, report library, and forum, all in one. It is designed to help you develop a mature, long-term report writing strategy for your organization based on best practices, and allows report writers to access a warehouse of sample, customizable reports.

DR Resource Center is a central location where Data Repository (DR) information and assistance is available to MEDITECH sites. It contains a suite of tools designed to leverage MEDITECH's DR and helps hospitals establish and maintain DR best practices.

DR Resource Center starts with a core set of Microsoft® SQL programming code applicable to any hospital. These views, stored procedures, functions, indexes, and SQL Server® Reporting Services (SSRS) reports are designed to help hospital IT staff write accurate, efficient reports in less time.

Additional programming and reports are available to browse and download. These items can be used "as is" or can be customized to suit your hospital's needs.

Wealth of DR Information

Our DR Resource Center password-protected user interface gives you a wealth of DR information at your fingertips:

- Training Videos and Documentation
- Microsoft SQL Views
- Microsoft SQL Stored Procedures
- Library of SSRS Reports
- Library of Lookup Parameters
- Toolkit of SQL Functions
- Discussion Forum

Contact us today, and see why so many hospitals trust iatricSystems for all of their Data Repository needs.

Key Advantages Include:

- Core set of Microsoft SQL programming code
- On-demand training videos
- Frequently updated content
- SSRS report library
- Renewable, annual subscription

DR Resource Center is available to MEDITECH 6.1, 6.0, Client/Server, and MAGIC sites. For more information about our **DR Resource Center**, or any other iatricSystems products or services, contact us using the information below.
