

EHI Export

Analytics on Demand certified health IT which stores limited electronic health information (EHI) supports the ability to export EHI in an electronic and computable format. Analytics on Demand is not patient care-centered software. Its intended use is to assist with the calculation of measures related to the CMS Promoting Interoperability Program.

[170.315\(b\) \(10\) Electronic Health Information Export](#)

The applications provide the export of electronic health information (EHI) for a single patient as well as for a patient population in the following formats.

Analytics on Demand provides capabilities for end users to export EHI. Permissions for export capabilities are governed in Admin, User Roles (SSO). Users with the ability to export can do so from Reports or the Database, Visit module within the application.

Users select options to export using Word, Excel, Text File, HTML, Image File, MHT file, RTF file, and CSV (comma delimited).
