PtAccess certified health IT patient portal which stores electronic health information (EHI) supports the ability to export that EHI in an electronic and computable format. This includes both a single patient export capability intended for fulfilling a patient's right of access request and a patient population export intended for facilitating data transitions when providers switch health IT systems.

170.315(b) (10) Electronic Health Information Export
The applications provide export of electronic health information (EHI) for a single patient as well as for patient population in the following formats.

PtAccess provides capabilities for end users to export EHI. Permissions for export capabilities are governed by the Admin User Roles. Users with the ability to export select export options using HTML (web), XML, CCD, and PDF.
