iatricSystems™

6.1 Reports Migration

Your partner for successful 6.1 reports

For more than 20 years, iatricSystems™ has worked with MEDITECH hospitals to convert existing reports and create new ones as systems have migrated from MIIS to MAGIC, Client/Server, 6.0, and now 6.1. With our reputation for outstanding Report Writing Services in the MEDITECH community, you can confidently partner with iatricSystems to help you overcome the complexities of reporting in the 6.1 environment.

6.1 Reports Require a Lot of Work.

All hospitals that implement MEDITECH's 6.1 EHR — even those already running 6.0 — have a lot to consider when migrating to the 6.1 platform:

- For all sites migrating to 6.1, all ADM, BAR, ABS, SCH, and ORM reports must be rewritten
- All other reports referencing data from those modules must also be rewritten for 6.1
- For sites migrating from MAGIC or Client/Server to 6.1, in addition to the bullet points above, all reports referencing EDM, OM, or NUR/PCS data must be rewritten for 6.1
- Plus, you'll need to update report queries to move away from Possessive field usage, and switch to JOIN-ing to the appropriate dictionary field(s) instead

Why must this be done? Because data structures change dramatically in 6.1. Whether you have thousands of reports or just hundreds, _that's a lot of work_.

Simplify It.

iatricSystems has the expertise to simplify your 6.1 reports migration and do the heavy lifting for you. We can lift as much — or as little — of the burden as you choose. We offer these flexible, affordable options:

- **Current Report Analysis:** Worth its weight in gold, we will analyze all of your existing NPR and Data Repository reports, then:
  - Produce an inventory of all existing DR-based reports published in SSRS Report Manager
  - Produce an inventory of all existing NPR-based reports
  - Identify usage of existing DR+SSRS and NPR-based reports
  - Flag existing DR and NPR reports that must be rewritten for 6.1
  - Estimate how many hours it may take you — or us — to rewrite them
- **DR Resource Center**™**:** This online resource offers training videos and documentation that can elevate your staff to the next level of Data Repository report writing. Its low annual subscription fee will likely not even require a capital purchase request. Jump-start 6.1 report writing by trying DR Resource Center for one year; you won't be disappointed.
- **Prepaid Report Writing Blocks:** Legions of hospitals take advantage of discounted report writing blocks from iatricSystems. Here are three examples of the money you'll save:
  - Purchase 250 hours, and you'll save $3,750
  - Purchase 500 hours, and you'll save $10,000
  - Purchase 1,000 hours, and you'll save $22,000

It's your migration — you decide. We're here to provide whatever report writing assistance you need. For more information about our **Report Writing Services**, or any of the options listed above, contact us using the information below.
