

Integration is Everything

## **“Best in KLAS” Report Names Iatric Systems No. 1 for Patient Privacy Monitoring**

Customers give Security Audit Manager™ high marks in every category

**Boxford, Mass. – Jan. 29, 2015 – [Iatric Systems, Inc.](#)**, a comprehensive healthcare IT integration company, today announced that its [Security Audit Manager](#)™ was named KLAS Category Leader in the Patient Privacy Monitoring segment of the *2014 Best in KLAS Awards: Software & Services* report. Security Audit Manager, which rated above average in every category, has been implemented in more than 900 healthcare facilities throughout the U.S. and Canada since its release in 2003.

Security Audit Manager integrates and correlates data from all access to Protected Health Information (PHI) from diverse systems, proactively detects breaches, and automates patient privacy monitoring. Security Audit Manager also provides alerts on potential privacy breaches, identity theft, snooping, or other suspicious activity.

“The KLAS recognition is very rewarding because it’s based on healthcare organizations’ real-world experience with Security Audit Manager,” said Frank Fortner, President of Iatric Systems. “We believe that customers ranked us highly with KLAS because of our strong customer support. In addition, we have a very strong user group, and because we listen carefully to their issues, we have delivered new functionalities to meet their needs.”

Direct customer feedback led Iatric Systems to further expand its Patient Privacy portfolio by releasing new solutions, including [Privacy Risk Manager](#)™ and [Auditor’s Desktop](#)™. Privacy Risk Manager monitors the risk of business associates access to PHI, and Auditor’s Desktop provides advanced analysis and intelligence of user/patient history and ranks privacy violations by severity for swift action.

“Data breaches and the need to protect patient health information isn’t going away any time soon, and if anything, it’s intensifying,” said Rob Rhodes, Senior Director of Patient Privacy Solutions at Iatric Systems. “Proactively monitoring access to patient data is the main way healthcare organizations can combat the insider threat and help reduce the risk of a data breach. We created Security Audit Manager to help healthcare organizations comply with HIPAA, automate privacy auditing, and eliminate data silos.”

### **About KLAS**

KLAS is a research firm on a global mission to improve healthcare delivery by enabling providers to be heard and counted. Working with thousands of healthcare professionals and clinicians, KLAS gathers data on software, services, medical equipment, and infrastructure systems to deliver timely reports, trends, and statistical overviews. The research directly represents the provider voice and acts as a catalyst for improving vendor performance.
