

PHYSICIAN EDUCATION

We understand that physicians rarely have time to sit in a classroom. That's why we developed a curriculum format that accommodates hectic schedules and incorporates tools and facilitation best practices so that learning sticks.

OBJECTIVES

Our educators specialize in facilitation and healthcare technologies such as EMR/EHR, CPOE, and decision-support tools. We strive to engage and educate your busiest clinicians and focus on highly targeted, concise, and flexible content design and instruction. Whether one-on-one or small group facilitation, the Sedona approach accommodates varying levels of comfort with technology as well as learning needs and styles. Our just-in-time tool that is accessible from mobile devices facilitates physician adoption. Our team will build in tracking and assessment to measure learning, and to allow for private remediation as needed.

OUR PHYSICIAN EDUCATORS WILL

Your physician educators from Sedona Learning Solutions will:

- Tailor training to accommodate learning preferences and technology comfort levels
- Deliver tools at the point of need, specific to the physician
- Offer a range of learning platforms, including eLearning, one-on-one, at-the-elbow, and small-group training
- Accommodate busy schedules with targeted information that can be delivered in short, useful bursts
- Assess learning and remediate privately and respectfully. Our goal is to empower physicians to confidently and effectively use healthcare information technologies in their daily patient care
