

TRAINING PROJECT MANAGEMENT

When you are planning and implementing healthcare technology training, skillful training in project management is essential to keeping your efforts on track and ensuring project outcomes.

How We Help:

Sedona Learning Solutions can coordinate and oversee all aspects of training initiatives regardless of the size, composition, complexity, or needs of your team. As your partner, your Sedona project manager will work closely with you to keep training milestones on track, maintain a tight focus on helping learners confidently implement new technologies, and measure project success.

We'll also:

- Establish a shared vision and a clear training plan that emphasizes performance outcomes
- Analyze audience needs, constraints, and challenges
- Navigate change management to increase user preparedness and adoption
- Manage planning, design, promotion, and implementation of training efforts
- Lead regular education team meetings and provide status reports to project leadership
- Support logistics of training registration, scheduling, and attendance
- Continuously track and report performance measures
