DR Resource Center™

MEDITECH Data Repository Information at Your Fingertips

DR Resource Center™ is your one-stop shop for all things Data Repository related — technical resource, training center, report library, and forum, all in one. It is designed to help you develop a mature, long-term report writing strategy for your organization based on best practices, and allows report writers to access a warehouse of sample, customizable reports.
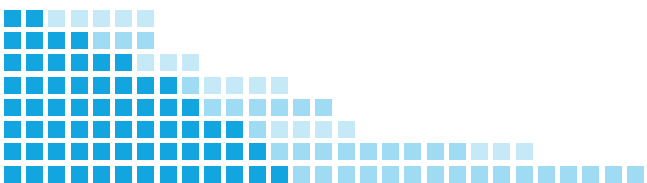

DR Resource Center is a central location where Data Repository (DR) information and assistance is available to MEDITECH sites. It contains a suite of tools designed to leverage MEDITECH's DR and helps hospitals establish and maintain DR best practices.

Why DRRC?

With a library of Microsoft® SQL Server® Reporting Services (SSRS) reports, a toolkit of SQL functions, training videos, and other resources, your report writers can begin producing DR reports immediately.

Key Advantages Include:

- Core set of Microsoft SQL programming code
- On-demand training videos
- Frequently updated content
- SSRS report library
- Renewable, annual subscription
- Compatible with third party hosted systems (CloudWave, MaaS, etc.)

The MEDITECH Data Repository Resource Center in Detail

The DRRC is your one-stop shop for all things Data Repository (DR) related

How it Works

DR Resource Center starts with a core set of Microsoft® SQL programming code applicable to any hospital. These views, stored procedures, functions, indexes, and SQL Server® Reporting Services (SSRS) reports are designed to help hospital IT staff write accurate, efficient reports in less time.

Additional programming and reports are available to browse and download. These items can be used "as is" or can be customized to suit your hospital's needs.

Host Locally or Remote

Whether you're locally hosted or remotely hosted, the benefits of the DRRC are the same. There is no noticeable difference to the end users of the reports, and the only difference for SQL coders and report writers is the way they will connect to/code on the SQL server.

For MaaS customers, iatricSystems will work with MEDITECH to setup the needed connections and permissions that allows for the flow of data between the DR and on-site hosted SSRS server.

Wealth of DR Information

Our DR Resource Center password-protected user interface gives you a wealth of DR information at your fingertips:
- Training videos and documentation
- Knowledge base articles
- Discussion forum
- Library of SSRS reports
- Library of SQL tables (configuration, logging, dictionary, etc)
- Library of SQL views
- Library of SQL functions
- Library of SQL stored procedures
- Library of lookup lists (parameter listing) for reports

Supported EHRs

The DR Resource Center is available to:
- MEDITECH Expanse, 6.1, 6.0
- Client/Server
- MAGIC sites
- MaaS (MEDITECH as a Service)

For more information about the DR Resource Center™ or any other iatricSystems products or services, or to request a demonstration, please contact us using the information below.

Additional types of costs may include server and storage hardware, Microsoft licensing (OS, database, etc.), 3rd party licensing (digital certificates, backups, etc.), and 3rd party interface/ integration. Please consult with iatricSystems for the specific server hardware and software requirements for this product.
