

# PtAccess®

Unlike vendor-specific portals that may only provide data from one system, PtAccess® integrates data from any system, giving your patients one place to access all of their healthcare information. PtAccess provides an easy, low-cost way to give your patients access to their health information. PtAccess is Stage 2 and Stage 3 certified.

### One portal, all systems, all patient information.

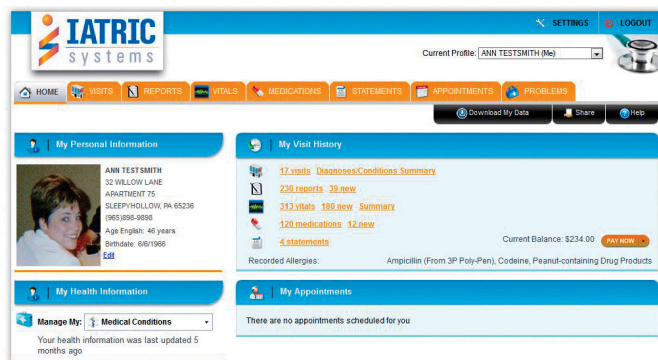

**PtAccess** provides patients secure online access to their health information and makes it simple for you to be fully compliant with this Meaningful Use requirement.

There is no need for your staff to compile and transfer electronic copies of health information to your patients when requested. Valuable time is saved. With PtAccess, your patients can:

- View, print, and securely email their health information
- Download their health data to multiple formats
- Access discharge instructions
- View health information documents scanned into the Hospitals EHR
- Access list of home medications
- Utilize links to find more information about their medications
- Record personal health information
- Manage appointments by requesting a change, setting up reminders and adding to their online calendars
- Fill out and submit online forms

### Ensure patient engagement with your patient portal.

To ensure patient engagement and meet Meaningful Use requirements, hospital staff needs tools and services that help them educate and train their patients about the benefits and potential of utilizing the portal. Technology paralleled with staff training is the key to adoption. Ask us about our Patient Engagement Services for more information.

### Key Advantages Include:

- Complete patient information
- Standards-based integration
- Online account review with bill pay capabilities
- Electronic discharge instructions
- Patient visit history
- Clinical results reporting
- Medication history

- Multi-language support
- Stage 2 certified (2014 edition)  
Stage 3 certified (2015 edition)
- Enables secure messaging between patients and providers
- Enables Direct Messaging between hospitals, physicians, patients, and other trusted providers
- Cloud Hosting is available

For a demonstration or more information on **PtAccess**, or any other iatricSystems products or services, please contact us using the information below.

Additional required software may include: OS, database, backup, virus protection, digital certificate, and HIS/EMR software.

Additional Types of Costs may include: server and storage hardware, Microsoft licensing (OS, database, etc.), 3rd party licensing (digital certificates, backups, virus protection, etc.), and 3rd party interface/integration. This product utilizes Direct Secure Messaging (DSM) to send/receive data. Iatric's DirecConnect Gateway can be used to satisfy the DSM requirement. A DSM product may require additional hardware, licensing, and other fees may be required. This product uses 3rd party email systems, which may require additional software and licensing costs.

Limitations: This product requires the use of a Direct Secure Messaging (DSM) Solution. Customer responsible for contracting for the DSM separately as well as verifying it meets the needs of the recipients messages are being sent to. Mobile device support may limit some functionality available on the full desktop version. There are no contractual limitations for this product.
