Patient Privacy Managed Services

Proactive Auditing, Without the Stress

Our Patient Privacy Managed Services are designed specifically for organizations that need to enhance their patient privacy strategy without the burden of overstressed in-house resources. By leveraging our managed services, you can ensure that your organization maintains a proactive approach to patient privacy while remaining cost-effective—paying only for what you need.

How it Works

Our team of skilled privacy analysts will integrate seamlessly with your existing privacy program to provide comprehensive assistance, including running investigations, managing user and patient audit log reports, and adhering to custom-defined escalation processes. Additionally, you'll benefit from our advanced patient privacy monitoring solution, Haystack™ iS, which utilizes AI-driven analytics to strengthen your privacy initiatives.

You can expect regular reports (weekly, monthly, quarterly). Our experts analyze this data to ensure that your privacy program is not only fully optimized but also tailored to meet the unique demands of your healthcare system.

Why PPMS?

Our services help healthcare organizations quickly scale up to accommodate new requests and scale down when resources are no longer needed.

Key Features Include:

- Skilled privacy analysts dedicated to your patient privacy program
- Routine proactive auditing of PHI access
- Investigation assistance, and custom-defined escalation processes
- Thorough weekly, monthly, or quarterly reports
- Access to the latest patient privacy software, Haystack™ iS, powered by AI
- Scalability and flexibility that cannot be easily achieved with in-house teams
- Available for short-term or long-term projects
- Competitive pricing that doesn't break the bank
