

CareContinuity™

Why CareContinuity?

Downtime should never put patient safety at risk. With CareContinuity, clinicians can access essential patient data including medical histories, lab results, radiology reports, medications, and more right at the point of care. As an EHR agnostic solution, CareContinuity ensures continuity of care by securely exporting patient summaries such as CCDA and CCD into encrypted PDFs for offline access.

This allows caregivers to confidently make informed decisions and keep care moving forward during both planned and unplanned outages. By providing a reliable, real-time snapshot of each patient's critical information, CareContinuity minimizes the risk of errors and delays. Clinicians can maintain workflow efficiency and focus on delivering high-quality care even when primary systems are unavailable.

Care Without Interruption

CareContinuity was built with clinicians in mind to ensure access to critical patient information during EHR or LAN downtime. Designed to be simple, secure, and reliable, CareContinuity empowers caregivers to continue providing high quality care even when systems are offline.

Key Advantages Include:

- Simple, user friendly
- Secure, encrypted offline patient summaries
- Printable MARs and online rounds lists
- EHR and LAN agnostic solution
- Protection of patient safety and data integrity
- Peace of mind for caregivers and patients
- Access to vital patient information

Access Critical Patient Data Without Delay

CareContinuity is built for rapid deployment and immediate readiness. Once configured, clinicians can securely view encrypted patient medical summaries and essential clinical information at the point of care, ensuring continuity even during system outages.

Protect Clinical Workflows

CareContinuity ensures teams have uninterrupted access to the information they need, reducing delays and eliminating risky manual processes. Clinicians can continue rounds with accurate patient data always available, and support safe and timely decision-making during both planned and unplanned downtime. This seamless access helps maintain workflow efficiency and keeps patient care on track at all times.

Scalable Reliability

CareContinuity is built to meet the needs of any healthcare organization, from community hospitals to large health systems. Its flexible, resilient architecture supports consistent performance across multiple sites, departments, and care settings, ensuring teams can continue delivering high-quality, uninterrupted care with confidence.

Simplify Downtime Management

CareContinuity centralizes patient information into a secure, easy to use downtime desktop so staff can stay focused on care.

- Access lab results, radiology reports, vitals, and nursing notes in one place
- Eliminate the need for paper binders or fragmented reports
- Reduce errors and maintain compliance with complete audit tracking

Reliability You Can Trust

iatricSystems is a trusted partner for healthcare organizations, offering solutions that keep critical patient data accessible and workflows uninterrupted. With more than 35 years of experience delivering healthcare IT, we combine deep industry expertise, proven interoperability, and responsive support, giving hospitals the confidence to maintain connected, continuous care.
